

# Fracking Action North

Fracking Action North is a coalition of NWT organizations, including Alternatives North, Ecology North, the NWT Chapter Council of Canadians, and Canadian Association of Physicans for the Environment, and individuals who are concerned that hydraulic fracturing (fracking) in the NWT is proceeding without a full and transparent consideration of all of the health, social, environmental and economic costs and benefits.

FAN invites all NWT residents to **learn more about fracking**, and the potential costs and benefits of this technology.

Action  
North**

# Sign the Petition

We urge NWT citizens to sign the following **NEW** petition that will be presented in the Legislative Assembly in March 2015.

To sign the **Fracking Moratorium Pending Comprehensive Regional Review** petition:

1. Visit the website [www.frackingactionnorth.ca](http://www.frackingactionnorth.ca)
2. Click on one of the **SIGN THE PETITION** links found on the homepage

---

We urge the Government of the Northwest Territories to put a **moratorium on horizontal hydraulic fracturing (fracking)** until a comprehensive, transparent and public review of the cumulative environmental, social and economic risks and benefits of the process is completed under Part 5.1 of the *Mackenzie Valley Resource Management Act*, and the NWT public clearly indicates whether the risks and benefits are acceptable or not.

We further urge the Government of the Northwest Territories to shift economic development away from the exploitation of fossil fuels and towards economic diversification based on renewable energy and conservation.
